Assigning authorisations in the Danish Financial Supervisory Authority's OAM system and how to use them

1. Do other users or companies need authorisation to report on behalf of you or your company?

How to assign an authorisation

Once you or your company has been registered in the Danish Financial Supervisory Authority's OAM system, you may choose to assign a technical reporting authorisation, i.e. a power of attorney, to another person or company.

Please note that the reporting party you select must already have a registered user account or be registered as a company in the OAM system.

Before you can assign an authorisation to a person or company, you must know the relevant user account's or company's unique ID in the OAM system, or the company's CVR number.

The authorisation enables the reporting party to submit announcements and reports on behalf of you or your company.

Please note that you can only assign technical authorisations to a personal user account or to a company.

User accounts for employees associated with a company have their own unique ID in the same way as personal user accounts. However, employee user accounts cannot be assign authorisations individually. Instead, an authorisation may be assigned to the company, after which all employee user accounts associated with that company will automatically also be covered by the authorisation.

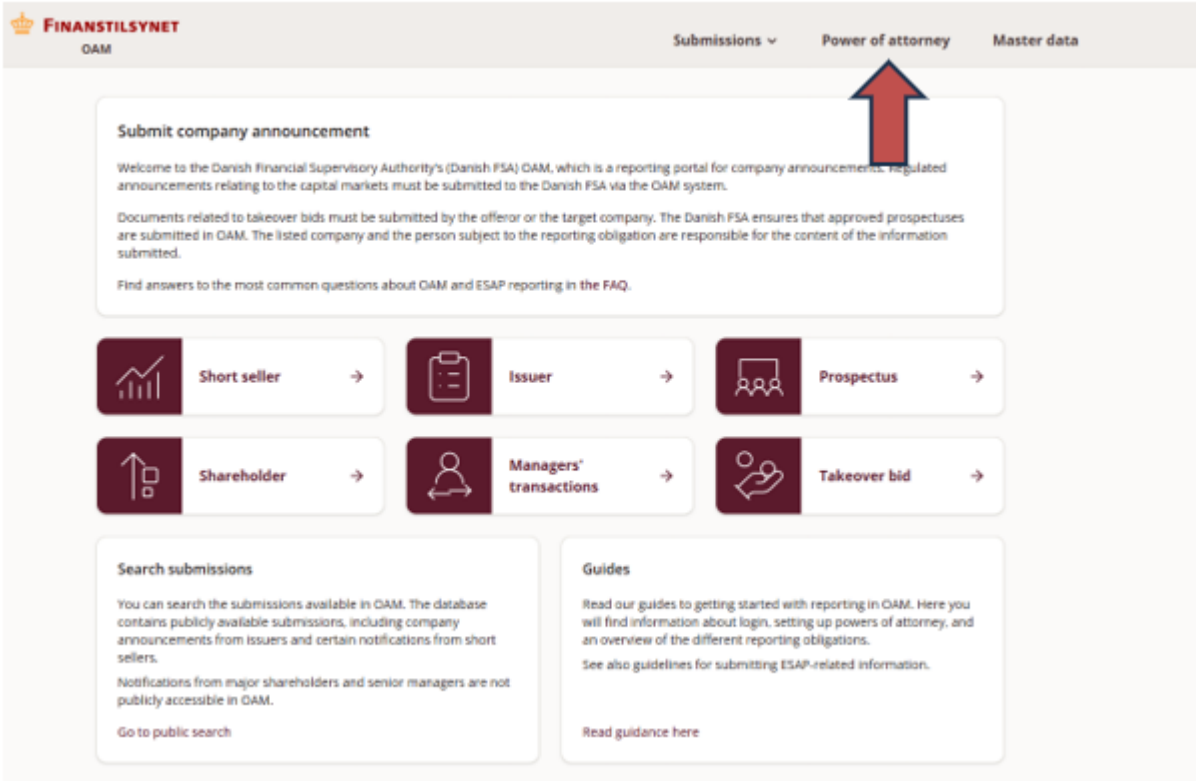

Make sure that you have the unique ID of the person or company to whom you wish to assign authorisation ready.

With the latest update of OAM in September 2026, it is only possible to report on behalf of others if an authorisation has been assigned in OAM.

If you want another person or company to be able to report on your behalf, you must therefore create an authorisation in the OAM system.

Click "Authorisation" in the user menu.

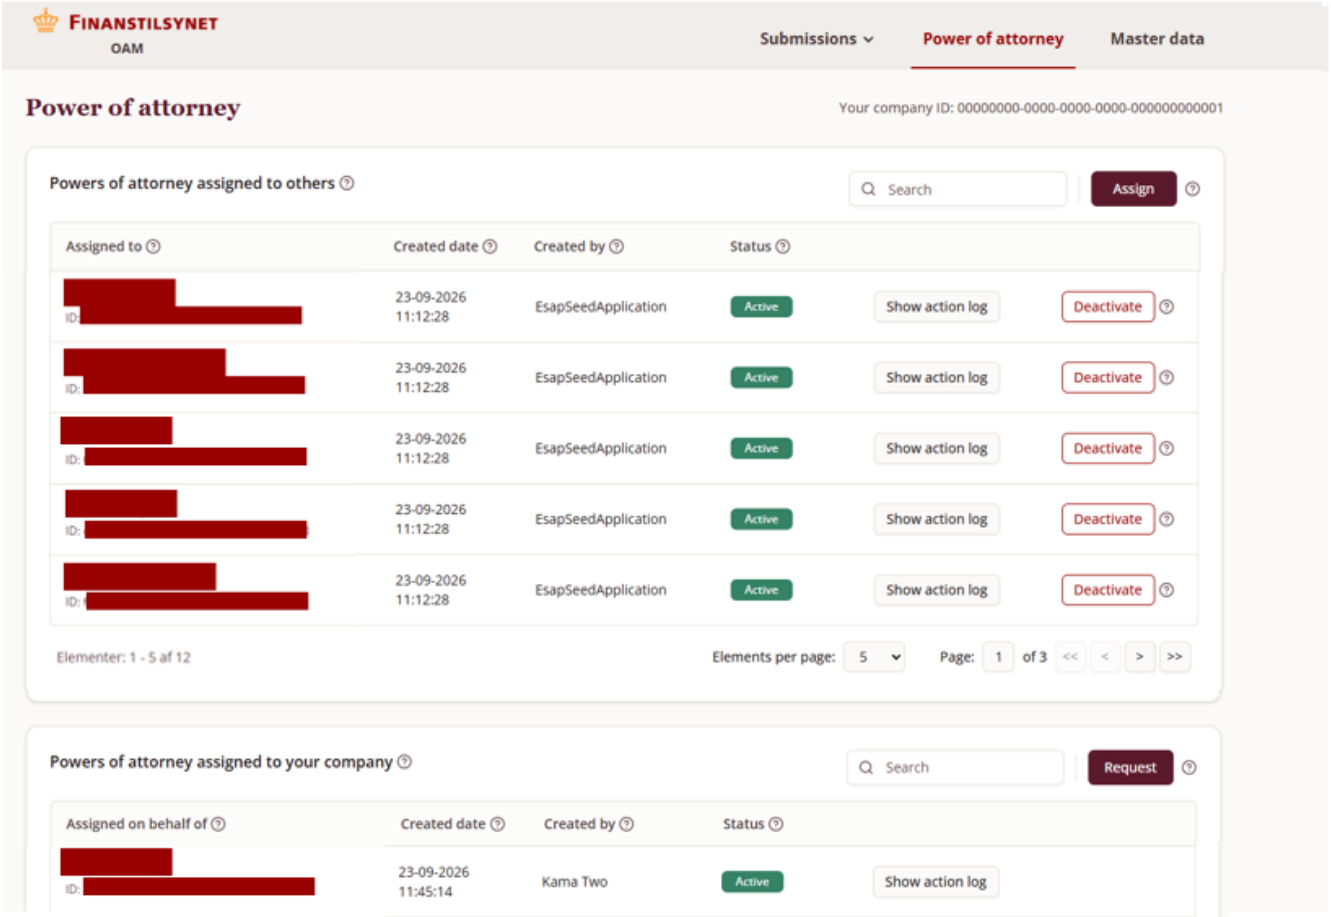

Latest update: November 2026

Submit company announcement
Welcome to the Danish Financial Supervisory Authority's (Danish FSA) OAM, which is a reporting portal for company announcements. Regulated announcements relating to the capital markets must be submitted to the Danish FSA via the OAM system.
Documents related to takeover bids must be submitted by the offeror or the target company. The Danish FSA ensures that approved prospectuses are submitted in OAM. The listed company and the person subject to the reporting obligation are responsible for the content of the information submitted.

Search submissions
You can search the submissions available in OAM. The database contains publicly available submissions, including company announcements from issuers and certain notifications from short sellers.
Notifications from major shareholders and senior managers are not publicly accessible in OAM.

Guides
Read our guides to getting started with reporting in OAM. Here you will find information about login, setting up powers of attorney, and an overview of the different reporting obligations.
See also guidelines for submitting ESAP-related information.
Read guidance here

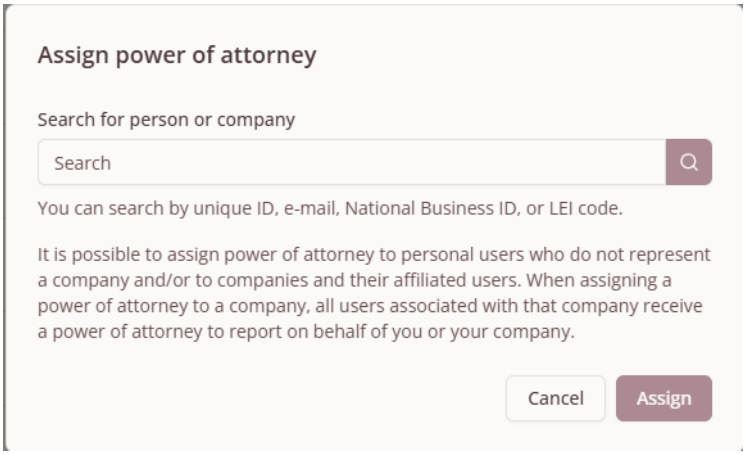

You can now view all your authorisations, both those that you or your company have assigned to others and those that others have assigned to you or your company.

You can also see whether the authorisations are active or not, and you can deactivate authorisations that you or your company have assigned to others.

Similarly, an authorisation assigned to you or your company can only be deactivated by the person or company that assigned the authorisation to you or your company.

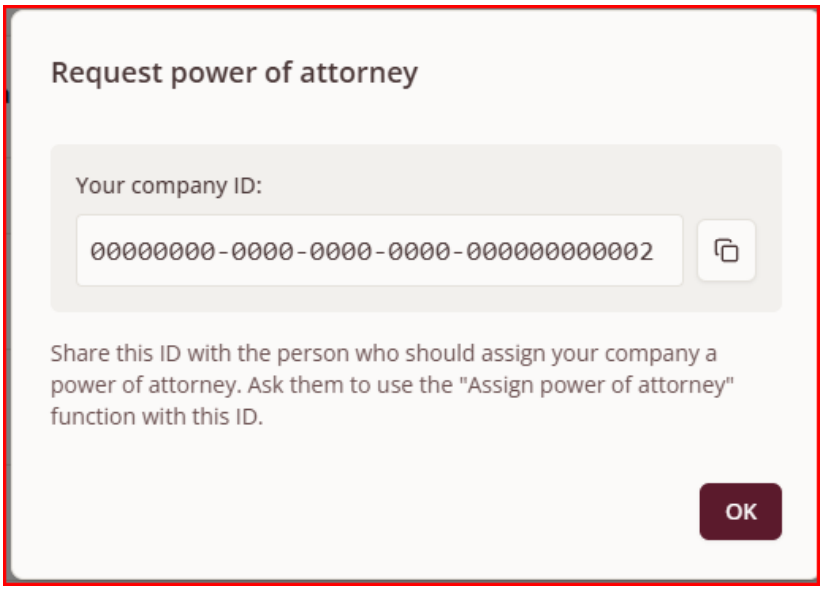

Click “Assign” to assign another party a technical authorisation in the OAM system.

Enter the unique ID of the user account or company to which you wish to request an authorisation.

Please note that if you wish to request an authorisation to a company, you must use the company's unique ID — not the unique ID of the individual user associated with the company.

You can now view the basic information about the person or company to whom you are about to assign authorisation. If the information does not appear, this means that you have not used a valid unique ID.

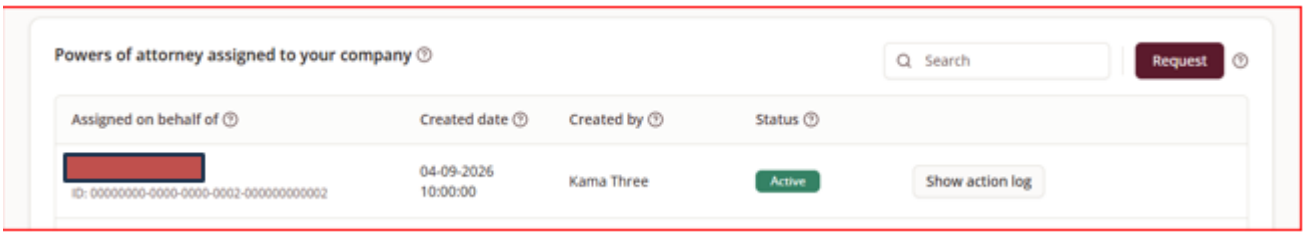

2. Do you need to use an authorisation to report on behalf of others? How to proceed

If you need an authorisation to report on behalf of others, click in the top right corner where your username is displayed. A list of names will then appear, showing who you can act on behalf of:

Authorisations granted by the company can also be viewed on the page:

3. Are you a lawyer reporting on behalf of your clients?

How to proceed

Law firms with special lawyer rights in the OAM system may assign authorisations to their own company on behalf of others.

Your company must have a Danish CVR number and be registered with the correct industry code in the CVR register in order for you to apply for lawyer rights in the OAM system.

The system checks whether the criteria are met when your company is registered in the system.
Lawyer rights are not granted to individual user accounts, but rather to all user accounts associated with the company.

Therefore, users associated with your company cannot apply for lawyer rights if the company does not meet the criteria.

All authorised law firms have the same industry code in the CVR register.
You must know your clients' unique IDs in order to exercise your lawyer rights and authorise yourself to submit announcements and reports on behalf of your clients.

Your clients must therefore be registered as users or companies in the OAM system.
